Welcome to the AMPRNet Portal

Please login to view the full range of services available. If you do not yet have an account, please register using the link above, access is open to all licenced radio amateurs involved in packet radio throughout the World.

For technical information regarding getting started on 44-Net, please visit our Wiki at <https://wiki.ampr.org>

One of the most frequently asked questions, is "how do I get an IP address", so here is a link to our wiki that explains the process: https://wiki.ampr.org/wiki/Requesting_a_block

Thank you to everyone who has contributed to the portal effort.

Note: the people listed here have volunteered to issue IP addresses for their areas. They are not paid to do this service; please understand that they are perfectly at ease to deal with requests at a lower priority than the things that matter more, such as job and family. Please be patient when requesting an address.

In order to request an allocation please click on the country network you would like to request an allocation in. If your country is not listed, please click on the global 44.0.0.0/8 network at the top of the list and enter your country name in the "Message" box. If you know who the co-ordinator is for your country, please ask them to register on this site, so they can continue to manage your country's subnet. Otherwise please consider volunteering to act as co-ordinator for your country, by stating so in the "Message" box on the next page where you submit your allocation request.

Message:

Please use this form to contact your local coordinator
Your local coordinator can help you with allocation requests and DNS entries
If you have a more general query regarding 44-Net please join the 44-Net mailing list and ask your question there

เราเอา DNS (noip) พร้อมด้วย format name ที่กำหนด ส่ง Message ไปให้ admin นำเข้าสู่ระบบของ AMPRNet

ตัวอย่างเรากำหนดรูปแบบชื่อของไอพีที่เราได้มาเพื่อแจ้ง admin ให้ใส่ลงในระบบไอพี 44

ตัวอย่าง Format = hs26.HS9AWO add a 44.63.15.226 url = hs26.hs9awo.ampr.org

เว้นไม่ใช้งาน 44.63.15.224,44.63.15.39 ซึ่งเป็นหมายเลขไอพีเบอร์แรกและเบอร์สุดท้ายของเรา

hsgw.HS9AWO add a 44.63.15.225

hs26.HS9AWO add a 44.63.15.226

hs27.HS9AWO add a 44.63.15.227

hs28.HS9AWO add a 44.63.15.228

hs29.HS9AWO add a 44.63.15.229

hs30.HS9AWO add a 44.63.15.230

hs31.HS9AWO add a 44.63.15.231

hs32.HS9AWO add a 44.63.15.232

hs33.HS9AWO add a 44.63.15.233

hs34.HS9AWO add a 44.63.15.234

hs35.HS9AWO add a 44.63.15.235

hs36.HS9AWO add a 44.63.15.236

hs37.HS9AWO add a 44.63.15.237

hstunnel.HS9AWO add a 44.63.15.238

จากนั้นเอาหมายเลขชุดไอพี 44 ที่เราแจ้งมาให้ไปที่ Gateways -> Manage -> Select a network to add
